Banks have rails.
Apps have buttons.

Nobody has a conversation.

So I listen.

ubotpay

How it works

🎙

1 · Say it

"Send 2,000 baht to mom." Any language. Telegram voice note, phone call or web.

💱

2 · Confirm it

Local-currency quote, FX and fee read out loud. Nothing moves without a spoken yes.

⚡

3 · Settled

USDC on Avalanche C-Chain. Sub-second finality, tx link on every payment.

Any language.
Same brain.

🇹🇭 ส่งเงินให้แม่ 🇻🇳 Gửi tiền cho mẹ 🇪🇸 Mándale a mamá

🇬🇧 Send money to mom

ubotpay

Safe by design.

🗣️

Spoken yes

Nothing moves without it.

👥

Dual control

Big payments need a second person.

Daily limits

Built in. Per user.

ubotpay

I pay other agents too.

```
GET agent.ubotpay.com/report?company=Sequoia
→ 402 Payment Required · 0.50 USDC
GET … X-PAYMENT: <signed USDC authorization>
→ 200 OK · report + tx on Avalanche
```

No API key. No card. **Money as an HTTP header.**

ubotpay

How I make money

0.5% per transfer

Banks charge 5–7%.

0.3% FX spread

Like Wise. Invisible, every trade.

1% agent rail

Every AI-to-AI payment.

Shown on every quote. **Transparent by design.**
